## **Introduction**

The Microsoft Business Solutions - Great Plains Inventory Control class explores all aspects of the Inventory module from the initial setup of inventory items and the multiple methods of valuation supported, to the types of inventory transactions available and the tight integration to the Purchase Order Processing and Sales Order Processing modules.

## **Audience**

Inventory Control training is recommended for anyone who plans to implement, use, maintain, consult, or support any part of the Inventory and Order Processing series. The class is targeted toward administrators, office managers, CEO's, and consultants who need to understand the technical aspects of Inventory Control and gain foundational knowledge of the application functionality.

## **Course Topics:**

Inventory overview  
Setup of items and classes  
Setup of units of measure schedules  
Serial and lot numbers  
Inventory adjustments
